NEELKANTH MEHTA

Mumbai, Maharashtra, India | +91-932-425-6300 | neilstrong2003@yahoo.com

PROFESSIONAL SUMMARY

Data Analyst and Business Intelligence (BI) professional with 7+ years in financial analytics, quantitative modelling, and data engineering. Expertise in Microsoft Fabric, SQL, Python, Power BI (PL-300 certified), and cloud analytics. Proven track record in Asset Liability Management (ALM), securitization modelling, portfolio analytics, and automation. Strong background in statistical analysis, machine learning, and financial engineering.

TECHNICAL SKILLS

Programming & Analytics: Python (Pandas, NumPy, Scikit-Learn, TensorFlow), SQL (CTEs, window functions, optimization), R

BI & Visualization: Power BI (DAX, PL-300), Tableau, Excel (Power Query, Power Pivot, VBA)

Cloud & Data Platforms: Microsoft Fabric (OneLake, Lakehouse), Azure Synapse Analytics, Azure Data Lake, AWS S3

Data Engineering: ETL/ELT pipelines, data warehousing, modelling, schema design, API integration

Quantitative Finance: Financial modelling, risk analytics, portfolio optimization, Monte Carlo simulation, time series forecasting, regression analysis, machine learning (supervised/unsupervised), predictive modelling

PROFESSIONAL EXPERIENCE

Senior Analyst, Asset & Liability Management

Amherst Real Estate and Development | November 2023 – Present

- Delivered fund-level ALM analytics across portfolio of 49,000+ single-family rental units, supporting strategic decisions for debt structuring, liquidity planning, and capital deployment across multiple institutional funds
- Developed ALM dashboards for executive leadership and investors, visualizing key metrics such as LTV, DSCR, and portfolio-level leverage—enhancing transparency and investor confidence
- Ensured compliance with U.S. GAAP, SEC reporting standards, and internal audit protocols through rigorous data governance and documentation

Analyst, Portfolio Management

Amherst Real Estate and Development | June 2021 – November 2023

- Engineered automated reporting pipelines using SQL, Python, and Power BI, integrating data from Yardi Voyager, Azure MySQL Flexible Server, and MySQL Workbench—cut manual reporting time by 65% and improved data reliability
- Modelled property-level and fund-level cash flows to forecast debt service coverage, refinancing needs, and reserve adequacy—directly informing capital calls and distribution schedules

Freelancer / Academic Mentor

Self-Employed | June 2020 – May 2021

- Provided tutoring in Machine Learning, Python programming, and quantitative finance for Certificate in Quantitative Finance (CQF) students

Intern – Encore Fellow

Barclays | February 2020 – June 2020

- Automated market data capture using Python (Selenium, web scraping), improving accuracy and reducing retrieval time by 80%

- Created integrated Excel-Python dashboards eliminating 95% manual effort (8 hours/week) in performance tracking; optimized VBA macros reducing runtime by 50%

Senior Portfolio Analyst

JP Morgan Chase & Co. | May 2016 – August 2018

- Performed asset valuation, credit analysis, and performance tracking for $500M investment portfolios; underwrote new investments
- Implemented process improvements in financial reporting increasing efficiency by 25% through automation and standardization

EDUCATION

Master of Science (MSc), Financial Engineering | WorldQuant University | Sep 2019 | CGPA: 84%

Thesis: A Value Investment Strategy Combining Security Selection and Market Timing Signals (Published on SSRN)

Bachelor of Management Studies (BMS), Marketing | University of Mumbai | Jul 2007

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) – Valid through October 2026
- Investment Management with Python and Machine Learning – EDHEC Business School (Coursera)
- Data Visualization with Tableau – University of California, Davis (Coursera)
