# NEELKANTH MEHTA

Mumbai, Maharashtra, India | +91-932-425-6300 | neilstrong2003@yahoo.com | https://neelkanthmehta.vercel.app

## PROFESSIONAL SUMMARY

Data Analyst and Business Intelligence (BI) professional with 7+ years in financial analytics, quantitative modelling, and data engineering. Expertise in Microsoft Fabric, SQL, Python, Power BI (PL-300 certified), and cloud analytics. Proven track record in Asset Liability Management (ALM), securitization modelling, portfolio analytics, and automation. Strong background in statistical analysis, machine learning, and financial engineering.

## TECHNICAL SKILLS

**Programming & Analytics:** Python (Pandas, NumPy, Scikit-Learn, TensorFlow), SQL (CTEs, window functions, optimization), R

**BI & Visualization:** Power BI (DAX, PL-300), Tableau, Excel (Power Query, Power Pivot, VBA)

**Cloud & Data Platforms:** Microsoft Fabric (OneLake, Lakehouse), Azure Synapse Analytics, Azure Data Lake, AWS S3

**Data Engineering:** ETL/ELT pipelines, data warehousing, modelling, schema design, API integration

**Quantitative Finance:** Financial modelling, risk analytics, portfolio optimization, Monte Carlo simulation, time series forecasting, regression analysis, machine learning (supervised/unsupervised), predictive modelling

## PROFESSIONAL EXPERIENCE

### Senior Analyst, Asset & Liability Management

*Amherst Real Estate and Development | November 2023 – Present*

- Delivered fund-level ALM analytics across portfolio of 49,000+ single-family rental units, supporting strategic decisions for debt structuring, liquidity planning, and capital deployment across multiple institutional funds
- Developed ALM dashboards for executive leadership and investors, visualizing key metrics such as LTV, DSCR, and portfolio-level leverage—enhancing transparency and investor confidence
- Ensured compliance with U.S. GAAP, SEC reporting standards, and internal audit protocols through rigorous data governance and documentation

### Analyst, Portfolio Management

*Amherst Real Estate and Development | June 2021 – November 2023*

- Engineered automated reporting pipelines using SQL, Python, and Power BI, integrating data from Yardi Voyager, Azure MySQL Flexible Server, and MySQL Workbench—cut manual reporting time by 65% and improved data reliability
- Modelled property-level and fund-level cash flows to forecast debt service coverage, refinancing needs, and reserve adequacy—directly informing capital calls and distribution schedules

### Freelancer / Academic Mentor

*Self-Employed | June 2020 – May 2021*

- Provided tutoring in Machine Learning, Python programming, and quantitative finance for Certificate in Quantitative Finance (CQF) students

### Intern – Encore Fellow

*Barclays | February 2020 – June 2020*

- Automated market data capture using Python (Selenium, web scraping), improving accuracy and reducing retrieval time by 80%

- Created integrated Excel-Python dashboards eliminating 95% manual effort (8 hours/week) in performance tracking; optimized VBA macros reducing runtime by 50%

**Senior Portfolio Analyst**

*JP Morgan Chase & Co. | May 2016 – August 2018*

- Performed asset valuation, credit analysis, and performance tracking for $500M investment portfolios; underwrote new investments
- Implemented process improvements in financial reporting increasing efficiency by 25% through automation and standardization

## EDUCATION

**Master of Science (MSc), Financial Engineering** | WorldQuant University | Sep 2019 | CGPA: 84%

*Thesis: A Value Investment Strategy Combining Security Selection and Market Timing Signals (Published on SSRN)*

**Bachelor of Management Studies (BMS), Marketing** | University of Mumbai | Jul 2007

## CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) – Valid through October 2026
- Investment Management with Python and Machine Learning – EDHEC Business School (Coursera)
- Data Visualization with Tableau – University of California, Davis (Coursera)
